## EGYPT.

By Consul Arthur Garrels, Alexandria.

The commercial and industrial activities of Egypt continue to be prosperous. The generally satisfactory economic conditions that have existed in the country during the several years past are largely the result of the presence of large bodies of British troops in the country. The Postal Savings Bank returns for 1918 show that the prosperity in Egypt is general and substantial, notwithstanding the increased cost of living. The total deposits reached 151,509 in number with aggregate cash credits of \$3,295,985. Corresponding figures for 1917 were 146,703 and \$2,353,135. Although the acreage under cotton was restricted, the uniform and high prices established by the Cotton Control Commission and the Cottonseed Control Board assured more than profitable returns to the cultivators and merchants in the interior. War restrictions still hampered imports and controlled the destination of exports.

### Foreign Trade Returns.

Total imports aggregated \$255,264,976 during 1918 against \$158,876,608 during 1917. In a few items only the increase was due to augmented quantities, but higher prices generally account for the larger figures for 1918. Exports for 1918 totaled \$226,396,400 while during 1917 the amount was \$204,892,454. The difference in exports is almost entirely the result of an increase in the shipments of cotton and cotton seed. As usual the larger part of the foreign trade was with the United Kingdom.

War restrictions prevailed beyond the end of the year. There are no indications that the foreign trade of Egypt assumed any new phases during 1918 that portend radical changes.

The table following shows the value of imports from and exports to the principal countries participating in Egypt's trade during 1917 and 1918:

#### Imports for Two Years According to Articles.

Coal for bunkering purposes is segregated under "merchandise in transit" in the Egyptian customs returns and is not included in the 1917 figures, but it forms part of the figures for 1918. The high price of coal is evident by comparing the quantities and values of the total imports of coal for the years 1917 and 1918. During 1917 the importations of coal for all purposes amounted to 1,444,596 tons with a value of \$55,588,281, while the amount for 1918 was 1,759,084 tons valued at \$94,158,117. Cotton piece goods almost doubled in price. Imports for 1917 were valued at \$34,879,342 for a quantity consisting of 15,095 tons and 94,561,104 meters, while the figures for 1918 were \$68,290,481 for 16,555 tons and 125,923,048 meters. Imports of mineral oils other than petroleum increased about \$10,000,000 in value and fully 77,000 tons in quantity.

The appended table gives the principal articles imported into Egypt during 1917 and 1918, showing quantities and values:

#### Principal Exports for Two Years.

Raw cotton is the predominating item in the export trade of Egypt and usually makes up more than 80 per cent of the total exports. Exports of cotton during 1917 amounted to 814,740 bales worth \$167,141,013 and in 1918 to 994,393 bales worth \$189,791,990.
